EDUCATION

National Institute of Technology Andhra Pradesh

2021-2025

B.Tech in Computer Science and Engineering
Tadepalligudem, Andhra Pradesh

EXPERIENCE

PharmEasy

09 2025 – Present

Software Developer Engineer Intern

Bangalore, India

- Developed Spring Boot microservices and REST APIs for appointment slot availability, integrating with external phlebotomist systems using Spring WebClient and implementing skill-based filtering to match diagnostic tests with qualified technicians.
- Developed the Micro DSA onboarding system using Spring Boot, automating partner onboarding and synchronization across microservices via REST APIs. Implemented request validation, Spring WebClient integrations, retry mechanisms, and structured logging for resilient downstream communication.
- Improved API performance and reliability using Redis caching, SQL query optimization, and connection pool tuning, reducing latency and ensuring stable responses under load.
- Built the Health Insights dashboard (React & TypeScript) on PharmEasy platform serving 25M+ users, enabling caregivers to manage numerous patient profiles, upload reports, and view organ-level insights, trends, and recommendations via API integration.

Nityo Infotech 📄

03 2025 – 08 2025

Software Developer Engineer Intern

Bangalore, India

- Built a resume parsing pipeline to extract structured candidate data (name, email, phone, skills) from PDF, DOCX, and image-based resumes using pdfplumber, Tesseract OCR, and regex, reducing manual HR screening effort.
- Developed a call sentiment analysis system using SpeechRecognition and VADER NLP, processing audio in chunks for better accuracy and visualizing sentiment trends via Matplotlib, deployed using FastAPI and Gradio.
- Built an email ingestion system using IMAP and SQLite to fetch, parse, and store emails with multi-format attachment processing (PDF, Excel, images); implemented a bulk SMTP email automation system with PAN-based document mapping, template personalization, and Excel delivery tracking, eliminating manual HR document dispatch.

Eclatprime 📄

05 2024 – 07 2024

Pega Intern

Hyderabad, India

- Designed BPM workflows on Pega covering case management, decision rules, SLAs, and escalation policies; proactively recommended team participation in the Pega community forum, leading the team to top 10 monthly contributors.

PROJECTS

Multiplayer Tic-Tac-Toe (Real-Time Game) 📄

2025

- Built real-time multiplayer game using Nakama game server with WebSocket-based server-authoritative gameplay, server-side move validation, match lifecycle management, and Classic/Timed modes with auto-forfeit on disconnect.

Volumetric 3D Lung Nodule Detection 📄

2024

- Developed a 3D deep learning pipeline for lung nodule detection from volumetric CT scans achieving 96.7 % recall, with end-to-end preprocessing, augmentation, and evaluation across precision, recall, and F1-score.

LinkNest - Secure Bookmark Management Platform 📄

2026

- Built a production-ready bookmark management platform using Next.js, TypeScript, Supabase, PostgreSQL, and Resend, enabling users to securely create, manage, and share bookmarks through personalized public profiles.

SKILLS

Languages: Java, Python, JavaScript, SQL, HTML, CSS

Frameworks & Technologies: Spring Boot, Node.js, Express, React, TypeScript, REST APIs, Microservices, WebSockets, Nakama

Databases, AI/ML & Tools: MySQL, MongoDB, Redis, PyTorch, TensorFlow, NLTK, VADER, Git, Docker, Kubernetes, GCP, Vercel, Cloudflare

CLUBS - ASSOCIATIONS & CERTIFICATIONS

- Joint Secretary of CSEA 📄
- Cloud Computing - NPTEL 📄

2023-24

2023
